	It should be Piracy → The unauthorized reproduction or copying of music, video, or literature without proper compensation or permission.
	Matching Questions
	1. Coverage area
	2. E-reader
	3. Virus
	4. Plagiarism

	5. Social media
	1. a Refers to the area in which a service provider offers its communication service
	2. b A device or computer program used for reading electronic books
	3. c Representing the language or thoughts of an author as your own, without indicating where the information is from
	4. d Media that use Internet and cell phone applications to interact, collaborate, and create content
	5. e A type of malware that replicates itself and spreads to other computers
	5 Multiple Choice Questions
	1. An abbreviation for Secure Sockets Layer; it is a protocol that provides security when communicating on the Internet (<i>No Answer</i>)
	1. Spam
	2. SSL
	3. MMS
	4. URL
	2. A video camera for computers typically used to provide real-time video footage (<i>No Answer</i>)
	1. Wiki
	2. Web 2.0
	3. Webcam
	4. RAM
	3. Getting hacked means that your computer or computer network has been broken into without your permission (<i>No Answer</i>)
	1. Hacked
	2. Wiki
	3. STEM
	4. RAM
	4. An area where a cell phone does not receive a signal (<i>No Answer</i>)

	1. Smartphone
	2. Dead zone
	3. QR code
	4. Cell tower
	True/False Questions
	1. MMS → An abbreviation for multimedia messaging service, which allows for sending video, audio, pictures, ringtones, and any other media through a cell phone
	2. Location-based service → A service provided through cell phone networks and accessed by cell phones which uses location to provide information on various places like restaurants, offices, museums, schools, etc.
	3. Hard disk drive → A computer device that reads, writes, and stores digital data
	4. Tablet → A website that is regularly updated and operates like a journal with writing, 2opinions, experiences, photos, videos, and links to other information on it
	It should be Tablet → A highly portable computer shaped like slate or pad of paper, featuring a touchscreen.
	5. Spreadsheet → A device or computer program used for reading electronic books
	It should be Spreadsheet → A computer application that simulates a paper accounting worksheet.
	Written Questions
	1. The extension of service or coverage in a wireless telecommunications system

	4. A way in which software is developed that allows access to the source code of an application or software and is free to update and use
	5. A vast global computer network which links smaller computer networks together
	Matching Questions
	1. MMS
	2. Malware
	3. Hardware

	4. Search engine
	5. Template
	1. a A computer program that locates information on the web
	2. b A standard display design used in blogs to provide a structure for information to be viewed
	3. c The physical parts of a computer
	4. d Computer software designed to harm a computer
	5. e An abbreviation for multimedia messaging service, which allows for sending video, audio, pictures, ringtones, and any other media through a cell phone
	Multiple Choice Questions
	1. An area where a cell phone does not receive a signal (<i>No Answer</i>)
	1. QR code
	2. Dead zone
	3. Database
	4. Cell tower
	2. Getting hacked means that your computer or computer network has been broken into without your permission (<i>No Answer</i>)
	1. Wiki
	2. HTTPS
	3. Server
	4. Hacked
	3. A computer application used for the production (including composition, editing, formatting, and possibly printing) of any sort of printable material (<i>No Answer</i>)
	1. Word processing
	2. Uploading
	3. Cloud computing
	4. Processor
	4. A string of numbers that indicates the location of a computer or server; commonly

	referred to as a web address or URL (<i>No Answer</i>)
	1. Spreadsheet
	2. Spyware
	3. Plagiarism
	4. IP address
	5. Quick Response code; a type of two-dimensional bar code, consisting of black modules in a square pattern on a white background, that can hold a large amount of any kind of data (<i>No Answer</i>)
	1. E-reader
	2. QR code
	3. Cookie
	4. Memory
	True/False Questions
	1. Location-based service → A service, such as web hosting, that is usually operated by a company in order to provide access to the Internet through servers
	It should be Location-based service → A service provided through cell phone networks and accessed by cell phones which uses location to provide information on various places like restaurants, offices, museums, schools, etc..
	2. Hard disk drive → A computer device that reads, writes, and stores digital data
	3. HTTPS → The same as HTTP a protocol or group of rules and functions that is used to transfer data over the World Wide Web and is secure; it is used for websites that handle sensitive information that would require greater security, such as payments and bank account information
